

- First make sure your iPhone has data coverage, either via Edge or Wifi
- Go to Settings > General > Network > VPN > Settings
- Click the **PPTP** button at the top
- Enter the server name as ***uk.focusvpn.com***
- In Account, enter your username.
- You can type your Password in the password field, or you may enter it on connecting.

- Push the save button

- You can now try connect by sliding the on/off switch to the on position.

- After you are connected, all of your traffic will be routing via the Secure-Tunnel VPN servers.
- The next time you want to connect, you can just go to Settings, and slide the VPN on/off switch to on!
